

WE'RE NOT WEIRD

By Michael Garland

Animal Features and Functions

Match the animal to the correct description by writing the letter next to the animal's description.

1. My stripes and special color help camouflage me from predators.

2. My tentacles help me to catch little fish to eat.

3. My nose has twenty-two feelers to help me figure out where I am.

4. My hard scales help protect me from predators.

5. My brightly-colored feet help me attract a mate.

pangolin

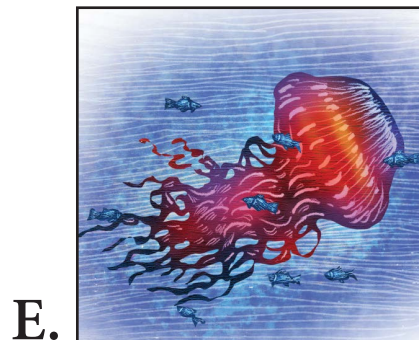

star-nosed mole

blue-footed booby

okapi

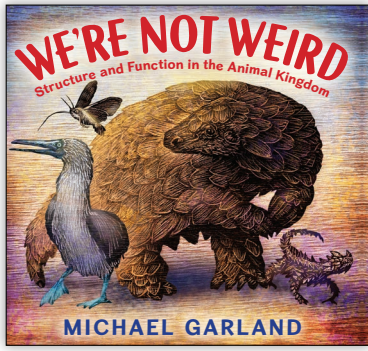

Atolla jellyfish
